Phone: +353 894185586|Email: sujunair@gmail.com|LinkedIn: linkedin.com/in/suju-n-2b412b17|Location: Ireland (Irish Citizen)

Results-driven Product Owner with deep domain expertise in financial services, specializing in data-driven product delivery across Counterparty Credit Risk, Commercial Lending, Market Risk, Payments, Digital Banking, Treasury, and Money Market platforms. Uniquely leverages AI tools (GitHub Copilot, GPT-5.2) to accelerate business analysis and agile delivery.

PROFESSIONAL EXPERIENCE

Vice President – Analyst II

Jul 2022 – Present

Bank of America (Counterparty Credit Risk Tech)

- Ownership of end-to-end requirements across Counterparty Credit Risk applications, including Potential Exposure (PE) and Settlement Risk using Monte Carlo analytics.
- Collaborate closely with Risk, Quant, Credit, and Technology stakeholders to ensure systems meet ECB, FCA, and FRB regulatory standards.
- Utilize AI copilots and GPT-based tools to rapidly draft Acceptance Criteria and UI mock-ups, reducing sprint preparation effort and improving quality.
- Built an Agentic AI solution integrating GitHub Copilot with Jira for autonomous user story generation.
- Lead cross-functional teams in agile settings to deliver strategic initiatives and resolve system data queries.

Business Analyst (Loan Origination & Monitoring)

Oct 2021 – Jun 2022

NTT DATA Ireland LTD – Allied Irish Bank

- Developed user epics and stories for EBA regulation on loan monitoring and large exposure reporting.
- Created AS-IS/TO-BE process maps for various credit origination engines within the bank.
- Supported system testing, UAT, and collaborated with Product Owners to refine backlogs.

Business Analyst (Counterparty Credit and Market Risk Tech)

Oct 2019 – Oct 2021

Bank of America

- Managed application stability initiatives encompassing Data Quality, Feed Timeliness, and Application Performance metrics.
- Conducted data feeds lineage analysis and provided actionable insights to senior management.
- Co-coordinated business change UAT and managed user story development cycles.

Lead Business Analyst & T24 Consultant

Feb 2019 – Sep 2019

Cognizant Technologies Ltd – Bank of Ireland

- Drove source system data mapping and Data Quality rules for T24 Core Banking Customer Migration.
- Conducted advanced Data Analysis using Teradata SQL for robust field transformation tracking.
- Documented overall data migration strategy covering Digital ID (B365 to T24) and single customer views.

Business Analyst & T24 Consultant

Apr 2016 – Feb 2019

Citco Bank Netherlands B.V

- Configured internet banking and treasury applications per rigorous corporate business requirements.
- Implemented GDPR and PSD II Strong Customer Authentication regulatory mandates.
